

EAST DEVON, this summer it's time to choose your *#FavouriteTree*

www.curio.xyz

June & July 2017

we are using the Curio Community Tree app to search for the best trees in the region as nominated by the people.

Search for **Curio-xyz** on the Google Play Store or on the App Store

To get involved, simply **download the Curio mobile app** for iOS or Android. Then **join communities** all around East Devon who are mapping and photographing their **favourite trees.**

Visit curio.xyz/help-page for quick videos to get you started

  : @curioxyz

Once you have installed the Curio mobile app get started by adding **your favourite tree** to the map if it's not already there.

Then take a photo of the tree or upload one from your files and tell us a bit about **what makes it so special**. You can include more than one picture at a time and don't forget to tag it **#FavouriteTree**

Connecting **people with nature**

Curio gives you a fun way to easily add your own photos and stories to the trees that you find.

It's also possible to quickly discover the species of any tree you don't recognise by uploading some photos to identify it and asking the Curio community for help.

By taking part, not only will you be able to add your own memories to these magnificent trees but your contributions will provide valuable help in improving and protecting the environment, heritage and biodiversity of the beautiful Devon region.
